

Puppy Feeding Schedule

Your puppy is on **FROMM Puppy (Pink Bag)**. They eat twice times a day until they are 3 months old, after 3 months gradually start working them down to getting fed once in the morning and evening. The puppies currently eat between 7-8 am and 5-6pm; we do offer a snack to our puppies in the late evening as long as they are in a playpen. The amount fed varies for each puppy, typically they are fed $\frac{1}{4}$ cup per feeding until they begin being fed twice a day than they are given $\frac{1}{2}$ cup (all of this depends on the puppy) if you have any questions regarding amount to feed ask your veterinarian or please feel free to give us a call and we can answer your questions. If you choose not to feed **Fromm Puppy (Pink Bag)**, it is best to gradually switch the puppy from Fromm puppy to their new food, switching them to quickly will cause GI upset leading to loose stool. If you choose to switch please follow the mixing recommendations below:

Mix as follows:

For the first 2-3 days mix $\frac{3}{4}$ **Fromm Puppy** to $\frac{1}{4}$ new food

Than mix $\frac{1}{2}$ **Fromm Puppy** to $\frac{1}{2}$ new food for 2-3 more days

Finally you will mix $\frac{1}{4}$ **Fromm puppy** to $\frac{3}{4}$ new food for 1-2 days

After that as long as the puppy has no complications and can tolerate the new food, you can start them at 100% their new food.

Note: It is our personal feeling that all personal feeling that most foods that can be purchased at the grocery store may not be a good quality food, typically the cheaper it is, the less nutritional it is for your puppy.

Water should ALWAYS be available to the puppy, other than in their crate!!

Be sure to take your puppy potty after eating and getting up from naps.

If you were to choose not to use **Fromm puppy** these are some other recommended foods for your puppy: **IF YOU CAN BUY IT AT THE GROCERY STORE OR DEPARTMENT STORE YOU SHOULD NOT BE FEEDING IT**

We recommend the following foods:

Fromm (any flavor)

Orijen

Acana
